

رقم الجلوس :

اسم الطالب :

امتحان مادة : العلوم بالانجليزية
للسف السادس الابتدائي
الفصل الدراسي الثاني - ٢٠٢٦

منصة الاختبارات
لأبنائنا فى الخارج

1- The processes that are accompanied by gaining thermal energy are:

a	Evaporation and condensation
b	Melting and freezing
c	Evaporation and freezing
d	Melting and evaporation

2- The process by which water exits plant leaf through stomata in the form of water vapor is called:

a	Respiration
b	Transpiration
c	Photosynthesis
d	Precipitation

3- When a quantity of liquid is heated, it:

a	Contracts and its density increases
b	Contracts and its density decreases
c	Expands and its density decreases
d	Expands and its density increases

4- The main factor responsible for weather changes is:

a	Gravity
b	Water cycle
c	Wind
d	Sun
