

اسم الطالب:	رقم الجلوس:
 منصة الاختبارات الالكترونية لأبنائنا في الخارج	امتحان مادة : العلوم بالإنجليزية للسف الثالث الإعدادي (دمج) المتخلفين عن الفصل الدراسي الأول - ٢٠٢٦

1- Two cars are moving in the same direction, the first car is moving with 80 km/h, while the second is moving with 90 km/h, so the relative speed for the second car which is observed by the driver of the first car is

a	90 km/h
b	80 km/h
c	10 km/h
d	170 km/h

2- The shortest straight path between the starting and end points is the

a	distance
b	average speed
c	displacement
d	acceleration

3- The center of curvature of a concave mirror is located

a	behind the reflecting surface
b	in front of the reflecting surface
c	at the principal focus
d	on the reflecting surface

4- In the case of short sight, the images of distant objects are formed

a	behind the retina
b	exactly on the retina
c	in front of the retina
d	at a very distant point

5- The name of the scientific theory that suggests the universe emerged from a massive explosion about 15,000 million years ago is

a	Nebular theory
b	Crossing star theory
c	Modern theory
d	Big Bang theory

6- The part of the cell which is responsible for the process of cell division is

a	nucleus
b	cytoplasm
c	cell membrane
d	mitochondria

7- Reproduction by spores is considered most common in

a	flowering plants
b	animals
c	Fungi
d	bacteria
